UPCOMING HOROLOGY WORKSHOP

Saturday October 3rd, 2009
1: 00 to 5:00 pm
at Monarch Hotel, Clackamas, Oregon
Presenter: Mike Robinson

As we ran short of time at the last workshop, I will try and round up some stones and graver holders, and we can, time allowing, hone the gravers you made last time. The better the edge, the better the finish on your turned part.

Then, we will cover "workholding for the lathe". We'll cover collets, cement brasses, chucks (both 3 and 4 jaw), Jacobs chucks, pot chucks, face plates, cat heads, steady rests, how to make workholding devices for specific jobs, how to make support tools for specific jobs, turning between centers, and anything else you, the raptly spellbound audience, can come up with for questions, suggestions, or problems. A lot of the approach will be how to get a job done with what you have available, rather than how to go buy a lot of expensive equipment.

Those who bring their lathe will have an opportunity to make some of the demo items shown at the workshop.

Registration is required so we know how many chairs will be needed.

Please reserve me a chair at the Horology Workshop
